Dear Hiring Team,

My name is Muhammed and I am a full-stack Software Engineer proficient in Python and Javascript based stacks particularly React.js, Node.js, Django and Azure.

In terms of work experience, I started out my career as a Software Engineering Intern at Delivery Hero Middle East (Talabat), a large scale food delivery service in the Middle East, where I learned the ins and outs of delivery systems, logistics and related business flows. After graduating from my bachelor's degree, I worked as a Software & Machine Learning Engineer at [APCO Worldwide](#), a U.S based multinational consulting firm. There, I tackled NLP (natural language processing) problems such as sentiment analysis and topic modeling of clients' social media posts and developed interactive single page applications to generate and visualize insights creating a platform for our clients to better engage with their customers. In my second role at [Odoo](#), an open-source business management software platform, I was responsible for developing modules to expand the suite's capabilities across multiple application domain verticals including E-commerce, Sales, Accounting, Procurement and HR. I then joined [Global Changer](#), an established sustainability and climate tech startup, where I contributed towards building their carbon accounting tools and emission management platform for businesses to comply with recent EU regulations. Most recently, I have made a long-term move to Canada and am finishing up my Master's degree at [Queen's University](#). At Queen's, I've been researching harnessing the power of LLMs (particularly open-source LLMs) for software engineering use cases such as code-edit generation and also studying societal factors such as measuring encoded biases and privacy leaking tendencies of LLMs. To learn more about my work experience and projects, please visit my [website](#).

I am excited about the opportunity to work at DoorDash because I admire your commitment to leveraging technology to enhance food delivery and create positive experiences for customers and merchants alike. Your vision of connecting people with the best in their cities aligns perfectly with my passion for using data-driven solutions to solve real-world challenges. I am particularly impressed by DoorDash's focus on innovation and efficiency, and I am eager to contribute to a team dedicated to transforming the delivery experience and making a meaningful impact in the industry.

Given my diverse professional experience and skillset, I believe I would make a great addition to your team at DoorDash and would love to learn more about the opportunity in a call or meeting. Thank you for your time and consideration,

Best wishes,  
Muhammed
